GitHub Profile

PROJECTS

• Crop Yield Prediction

- A web app built using Flask, ReactJS, Bootstrap.
- Integrated with a **Machine Learning model** which can predict yield of a crop based on certain inputs which can help farmers to gain more information of yields.
- Used **Random Forest** Algorithm and historical crop data for training the ML model.
- github.com/MohitReddy/Crop_Yield_Prediction

• NewsUP

- A web app built using HTML, CSS , JavaScript along with Bootstrap.
- A news application which fetches the data from **newsAPI** and provides the required news for user.
- github.com/MohitReddy/News-Up

• Text Util

- A text utility built using ReactJS and Bootstrap.
- github.com/MohitReddy/Text-Util-React

Colorization Transformer

- Currently working on a Deep Learning project (Colorization Transformer)
- Given a grayscale image, the colorization proceeds in three steps.
- Colorization Transformer does a high fidelity image colorization based on self-attention

EDUCATION

- | | | |
|--|-------------|-------------|
| • Keshav Memorial Engineering College
Computer Science Engineering CGPA : 7.16 | 📍 Hyderabad | 2021 - 2025 |
| • Sri Chaitanya Junior College
Intermediate Grade : 92% | 📍 Hyderabad | 2019 - 2021 |
| • The Mother's Integral School
Schooling(SSC) GPA : 8.8 | 📍 Hyderabad | 2018 - 2019 |

ACHIEVEMENTS

- Got selected in a couple of technical projects and programs based on few eligibility tests in college.

SKILL

- Java, C, JavaScript, Python
- Data Structures, Algorithms
- ReactJS, NodeJs
- MySQL, Superbase
- Problem Solving
- Object Oriented Programming
- Git
- Servlets, jsp
- Machine Learning
